TECHNOLOGY

3D Shaped Technology è una nuova lavorazione digitale che si inserisce nel processo produttivo per conferire il massimo realismo ai prodotti ceramici, attraverso un procedimento superficiale che ne esalta la conformazione preservando le caratteristiche di robustezza, durezza e facilità di pulizia tipiche del gres porcellanato.

Coniugando visione e tatto in una realizzazione iperrealistica senza vincoli né limiti, la tecnologia 3D Shaped rompe gli schemi del concetto tradizionale di materia ceramica che, da una visione bidimensionale, passa a una realizzazione tridimensionale dove ogni dettaglio prende forma, colore e struttura.

Novità e avanguardia sono quanto caratterizza l'esclusiva 3D Shaped Technology che ha portato alla ribalta un'innovazione che ha cambiato radicalmente il concetto di superficie ceramica.

*3D Shaped Technology is a new digital process that is inserted in the production process to give maximum realism to ceramic products, through a surface forming process that enhances its conformation while preserving the characteristics of strength, durability and ease of cleaning typical of porcelain stoneware.*

*Combining vision and touch in a hyper-realistic realization without constraints or limits, 3D Shaped technology breaks the rules of the traditional concept of ceramic material which, from a two-dimensional vision, passes to a three-dimensional realization where every detail takes shape, colour and structure.*

*Development to find ever new technologies, able to offer all vanguard for the main international markets.*
